

CHAPTER 1: STATISTICAL INFERENCE & HYPOTHESIS TESTING

Equation [1.7]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.8]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.9]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.10]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.11]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.12]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.13]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.14]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.15]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.16]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.17]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.18]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.19]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.20]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.21]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.22]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.23]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.24]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.25]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.26]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.27]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.28]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.29]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.30]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.31]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.32]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [1.33]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

CHAPTER 2: STATISTICAL INFERENCE & HYPOTHESIS TESTING

Equation [2.7]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.8]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.9]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.10]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.11]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.12]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.13]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.14]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.15]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.16]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.17]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.18]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.19]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.20]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.21]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.22]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.23]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.24]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.25]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.26]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.27]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.28]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.29]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.30]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.31]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.32]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [2.33]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

CHAPTER 3: STATISTICAL INFERENCE & HYPOTHESIS TESTING

Equation [3.7]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.8]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.9]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.10]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.11]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.12]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.13]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.14]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.15]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.16]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.17]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.18]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.19]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.20]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.21]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.22]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.23]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.24]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.25]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.26]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.27]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.28]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.29]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.30]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.31]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.32]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [3.33]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

CHAPTER 4: STATISTICAL INFERENCE & HYPOTHESIS TESTING

Equation [4.7]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.8]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.9]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.10]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.11]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.12]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.13]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.14]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.15]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.16]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.17]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.18]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.19]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.20]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.21]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.22]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.23]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.24]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.25]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.26]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.27]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.28]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.29]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.30]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.31]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.32]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [4.33]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

CHAPTER 5: STATISTICAL INFERENCE & HYPOTHESIS TESTING

Equation [5.7]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.

Equation [5.8]: Let $X_1, \dots, X_n$ be i.i.d. with density $f(x; \theta)$. The likelihood function $L(\theta) = \prod f(X_i; \theta)$.
