

Line 130: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 158: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 186: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 214: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 242: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 270: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 298: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 326: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 354: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 382: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 410: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 438: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 466: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 494: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 522: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 550: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 578: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 606: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 634: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 662: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 690: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 718: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 746: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 774: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 802: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 830: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 858: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 886: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 914: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 942: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 130: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 158: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 186: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 214: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 242: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 270: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 298: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 326: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 354: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 382: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 410: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 438: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 466: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 494: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 522: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 550: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 578: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 606: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 634: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 662: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 690: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 718: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 746: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 774: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 802: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 830: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 858: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 886: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.

Line 914: The variance of a random variable X is defined as $\text{Var}(X) = E[(X - \mu)^2]$.
